Global MPS Cautious Balanced

Portfolio Date: 7/31/2024

Portfolio Objective & Strategy

The Global Model Portfolio Service (MPS) Cautious Balanced portfolio aims to optimise total returns (capital and income). It uses a wide range of assets, including an allocation to equities typically ranging between 30% to 55%, and is suitable for investors who wish to invest globally. Arbuthnot Latham manage the portfolio by tactically adjusting the asset allocation in response to the future outlook for markets.

Performance

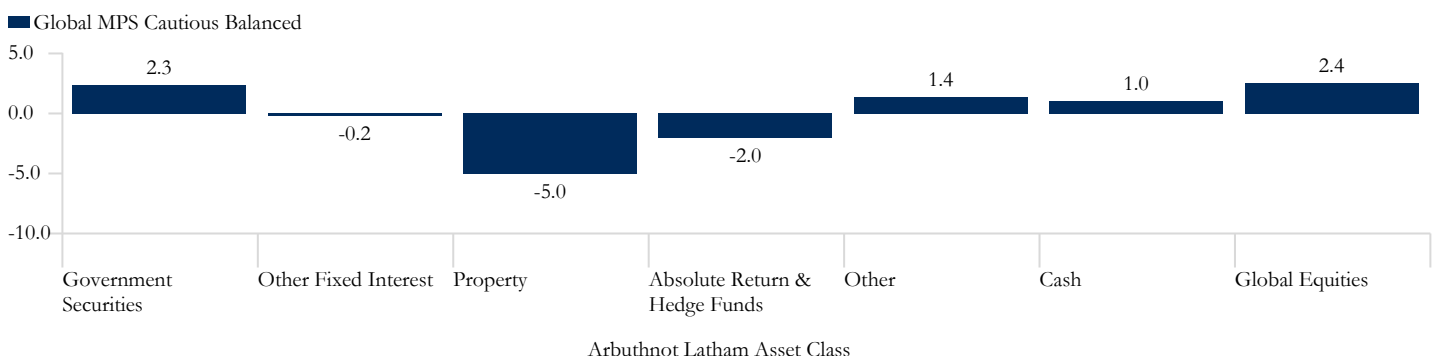

Past performance is not a reliable indicator of future results. Performance is shown net of underlying investment costs and does not include any fees paid to Arbuthnot Latham, the professional adviser or platform.

*The Global MPS was launched on 12 September 2022 and does not have historic performance data. Key information and performance recorded above is based upon Arbuthnot Latham Global Investment Service (GIS), which maintains the same objectives, risk profile and asset allocation as the Global MPS. Our analysis shows that historic risk and returns of the Global MPS would not have differed meaningfully from the actual risk and returns of the GIS. Performance data and top-ten holdings from 12 September 2022 will vary depending on the platform service due to the differing availability of investments on different platforms, which may not be represented on this factsheet.

**Asset allocation figures may not always add up to 100% due to rounding.

***Other may include investments in commodities, infrastructure and similar specialist alternatives.
